HYBRID VANDA SEEDLINGS IN 2-INCH POTS

Handled properly (See Page Q) Vandas will give you more flowers in wider color range and longer lasting than almost any other Orchid hybrid you can name. The following are all strong growing hybrids in 2-inch pots and, if properly grown with plenty of light, water and regular feeding program, should start producing their first flowers in two to three years.

V-3 V. PUNA X V. MARY FOSTER - Both parents have Sanderiana in the background, which assures good form. Mary Foster is a proven producer of round, flat flowers; red to golden brown.

V-26 V. HONOLII (Sanderiana, Hawaii X Herziana, Azure) - Large, open, heavy textured flowers, pink to deep blue with maroon markings. Very showy.

V-63 V. BURGEFII (Sanderiana X Suavis) - Practically ever flowering, large, mature plants averaging 100 blooms per year. Light pink with brown markings.

V-64 V. FRANKENSTEINIANA (Herziana x Coeurulea) - Good production of fine, deep blues.

V-129 V. KALALAU (V. PAKI X V. ELLEN NOA) - Small, perfectly shaped clear yellow flowers with red zone on green lip.

V-198 V. MANILA X V. CLARA S. FISHER - Both parents are fine quality Sanderiana hybrids. Manila is a proven pink of beautiful shape, amazing production of flowers and easy culture. Averages 12 to 15, 4" to 5" flowers per spike. Clara Fisher is very like Sanderiana; somewhat smaller, but producing greater quantities of blooms.

V-140 V. AGNES JOAQUIM X V. GILBERT TRIBOULET - Semi-terete, producing quantities of blue-lavender flowers, larger than Joaquim; more open form.

V-141 V. GILBERT TRIBOULET X V. TATZERI - Better than average blue and grey-blue flowers with brown markings and heavy textured Sanderiana form.
